Pham Quang Nam - AI Engineer

Address: Nam Tu Liem,HN / Phone: 038.555.1337 / Email: contact.nampham.work@gmail.com

Website · LinkedIn · GitHub

SUMMARY

AI Engineer with 3 years of experience shipping and operating production LLM systems in healthcare. Sole AI engineer behind the DentalTrip AI Assistant (dentaltrip.io/assistant), shipped end-to-end in 3 months for an international dental-tourism platform. Also built and operate the BookingCare RAG (Retrieval-Augmented Generation) chatbot serving 4,300+ users and 5,000 sessions/month. Focused on RAG architecture, Agentic system, embedding finetuning, LLM evaluation, and cost-optimization.

EXPERIENCE

BookingCare Technology JSC — AI engineer January 2024 - October 2026

Dentaltrip AI Assistant — sole AI engineer, end-to-end ownership July 2026 – Oct 2026

dentaltrip.io/assistant · AI assistant for international dental-tourism patients

- Shipped the product from zero to production in 3 months, owning the full stack: requirements, architecture, RAG pipeline, LLM integration, evaluation, and deployment.

BookingCare platform AI — production chatbot and ML systems

- Shipped and maintain the production Agentic system for health Q&A and consultation (bookingcare.vn/assistant): 4,300+ users, 5,000 sessions, 12,000+ questions answered per month, with 55.9% of sessions in real multi-turn interaction.
- Chatbot converts into 100 appointment bookings and 200 consultation requests per month — a direct revenue channel for the platform.
- Fine-tuned a special medical-domain embedding model improving answer accuracy from 70% to 90%.
- Developed an end-to-end ML system for specialist prediction (data collection, preprocessing, training, FastAPI serving), reaching 97% accurarcy across 20 specialist labels.

VietRad technology company — Image processing intern June, 2023 - September, 2023

- Processed and analyzed DICOM medical images using Dcmtk toolkits.

EDUCATION

VNU University of Science, HN October, 2020 - March, 2025
Data science

TECHNICAL SKILLS

Language:Python, Typescript, SQL; working knowledge: Java, C++, R
LLM & NLP: RAG, LLM agents, embedding fine-tuning (Sentence Transformers), LangChain/LangGraph, LLM evaluation
ML & Data: Python, computer vision, data pipeline
Engineering: FastAPI, Docker, Git, Claude Code, Codex

PROJECTS

Work Boost - (personal project)
Link github: work-boost

- Description: Work Boost is a productivity tool designed to help you manage and track your daily work tasks efficiently.
  - **Task Management**: Easily add, update, and delete tasks.
  - **Daily Reports**: Generate daily work reports.
  - **Integration with LLM**: Leverage AI to enhance your productivity.

AWARDS

Prize: First prize in Department-level statistical research competition May 2024

- Topic: Question answering system based on Sentences Transformer and LLM for medical text.

Prize: Second prize in Department-level scientific research competition May, 2023

- Topic: Improving and optimizing coding and node selection for coded distributed computing models.

CERTIFICATIONS

Deeplearning.ai
Machine learning specialization certificate March 11, 2023
